

THE DEEP LEARNING DUMP

ERNEST YEUNG [ERNESTYALUMNI@GMAIL.COM](mailto:ERNESTYALUMNI@GMAIL.COM)

From the beginning of 2016, I decided to cease all explicit crowdfunding for any of my materials on physics, math. I failed to raise *any* funds from previous crowdfunding efforts. I decided that if I was going to live in *abundance*, I must lose a scarcity attitude. I am committed to keeping all of my material **open-sourced**. I give all my stuff *for free*.

In the beginning of 2017, I received a very generous donation from a reader from Norway who found these notes useful, through *PayPal*. If you find these notes useful, feel free to donate directly and easily through [PayPal](#). PayPal does charge a fee, so I also have a Venmo, [ernestyalumni](#), and CashApp (via email <mailto:ernestyalumni@gmail.com>).

Otherwise, under the *open-source MIT license*, feel free to copy, edit, paste, make your own versions, share, use as you wish.

ABSTRACT. Everything Deep Learning, Deep Neural Networks

Part 1. Deep Neural Networks

1. GAUSSIAN PROCESSES

Yang (2021) for Tensor Programs I<sup>[1]</sup>

*Date:* 19 July 2023.

*Key words and phrases.* Deep Learning, Deep Neural Networks.
